Hysterectomy for the Treatment of Menorrhagia – Commissioning Policy

Intervention	Hysterectomy
OPCS codes	Abdominal Hysterectomy
OPG3 codes	Q071 Abdominal hysterocolpectomy and excision of periuterine tissue
	Q072 Abdominal hysterectomy and excision of periuterine tissue NEC
	Q073 Abdominal hysterocolpectomy NEC
	Q074 Total abdominal hysterectomy NEC
	Q075 Subtotal abdominal hysterectomy
	Q076 Excision of accessory uterus
	Q078 Other specified abdominal excision of uterus
	Q079 Unspecified abdominal excision of uterus
	Vaginal Hysterectomy
	Q081 Vaginal hysterocolpectomy and excision of periuterine tissue
	Q082 Vaginal hysterectomy and excision of periuterine tissue NEC
	Q083 Vaginal hysterocolpectomy NEC
	Q088 Other specified vaginal excision of uterus
	Q089 Unspecified vaginal excision of uterus
	Q009 Onspecified vaginal excision of dierus
	Laparoscopic Abdominal Hysterectomy
	Any of Q071 to Q079
	Y751 Laparoscopically assisted approach to abdominal cavity
	Y752 Laparoscopic approach to abdominal cavity NEC
	Laparoscopic Vaginal Hysterectomy
	Any of Q081 to Q089
	Y751 Laparoscopically assisted approach to abdominal cavity
	Y752 Laparoscopic approach to abdominal cavity NEC

These pharmaceutical

- Combined oral contraceptives (2nd line)
- Oral progesterone (3rd line pharmaceutical treatment) i.e. norethisterone
- Injected progesterone (3rd line)
- Endometrial ablation has been tried (unless the patient has fibroids >3cm, an abnormal uterus or other contraindications), or uterine artery embolization or myomectomy (if appropriate), and have failed to relieve symptoms or are contraindicated

Note: endometrial ablation is suitable for women who do not want to conceive in the future and should only be offered after full discussion of risks and benefits and other treatment options.

In addition, Humber Coast and Vale CCGs will fund hysterectomy for heavy menstrual bleeding due to fibroids greater than 3cm when the following criteria are satisfied:

- Other symptoms (e.g. pressure symptoms) are present
- There is evidence of severe impact on quality of life
- Other pharmaceutical, surgical and radiological treatment options have failed, or have contraindicated
- Patient has been offered myomectomy and / or uterine artery embolization (unless medically contraindicated)
- There is structural / histological abnormality of the uterus
- The woman no longer wishes to retain her uterus and fertility

Summary of evidence / rationale

Hysterectomy is a major operation and is associated with significant complications in a minority of cases¹. Since the 1990s the number of hysterectomies has been decreasing rapidly and it should not be used as a first line treatment solely for HMB. There are now a range of alternative treatment options for HMB.

NICE Clinical guidelines (2007)¹ emphasise that:

- The Mirena® device is effective in the treatment of menorrhagia and is considerably cheaper than a hysterectomy, even if required for many years (for contraception costs estimated at £207 including consultation; removal cost £26) and the fertility of the woman may be maintained. In a NICE study of long-acting reversible contraception³, the average annual cost of Mirena® was estimated at £70. This compares to the average cost to the CCG of performing a hysterectomy of £2,362.
- Other effective conservative treatments are available as second line treatment after failure of Mirena® or where Mirena® is contraindicated.
- A Cochrane systematic review showed that the Mirena® coil improved the quality of life of women with menorrhagia as effectively as hysterectomy

Hysterectomy should be considered only when¹:

- All other treatment options have failed, are contraindicated or are declined by the woman
- There is a wish for amenorrhoea
- The woman (who has been fully informed) requests it
- The woman no longer wishes to retain her uterus and fertility

	The supporting evidence is given in more detail in the evidence reviews and statements from the clinical guidelines on heavy menstrual bleeding given below. For details of the primary studies and systematic reviews that NICE used to make their recommendations and a full bibliography, see their full guidance at www.nice.org.uk
