# HCV EPaCCS Training

Dr Dan Cottingham, Vale of York CCG

Dr Jenni Lawrence, Scarborough & Ryedale CCG

Humber, Coast and Vale

# What is EPaCCS?

- EPaCCS (Electronic Palliative Care Co-ordination System) enables the recording and sharing of a patient's care preferences and key details about their care at the end-of-life
- Supports joined-up care for patients in the last months, weeks, days of life
- Enables accurate up-to-date clinical summary to be:
  - Shared across care settings (community, hospital, hospice)
  - Visible in-hours and out-of-hours to trained professionals
- Trained staff working across all care settings may upload/update/access information about the patient's care

# The Benefits of EPaCCS

Increased

- Number of patients able to die in preferred place
- Co-ordination of care
- Number of carers identified and supported
- Improved patient, carer and staff experience
- Clinician productivity

Decreased

- Number of 'difficult' end of life conversations between patients and staff
- Number of unnecessary
  - Ambulance journeys
  - Unwanted interventions
  - Inappropriate treatments
  - Hospital admissions
  - Bed days in hospital
  - Complaints

# Pilot Organisations

- York Acute Hospital
- York Community Services
- Humber Community Services (OOH services)
- St Catherine's Hospice
- YAS (OOH/111 Services)
- Vocare
- GP Practices:
  - Haxby Group Practice
  - Priors Medical Group
  - Pickering Practice
  - Derwent Surgery
  - Filey Practice
  - Sherburn Group Practice -
  - Millfield Surgery
  - Ampleforth Surgery
