

# Yorkshire and Humber Care Record to improve people's care

## Humber, Coast and Vale Health and Care Partnership

Dedicated to improving the overall health and wellbeing of people living in Humber, Coast and Vale.

## Our ambition

We're using the latest digital technology to provide health and care staff with better and faster access to important information about their patients, so they can offer the very best care.

## What we are doing

The Yorkshire and Humber Care Record is being rolled out across the Humber, Coast and Vale area with the aim of improving care for people who use health and care services.

There are hundreds of clinical computer systems across Yorkshire and Humber. They all hold clinical information about patients who have used services provided by their GP, at a local hospital, community healthcare, social services or mental health teams. Each record may hold slightly different information.

The Yorkshire and Humber Care Record will bring together certain important information from all of these systems so that medical and care information held about a patient or service user can be centralised into one easy-to-use system.

# Making a difference

GP practices in Humber, Coast and Vale have already started to share information with Leeds Teaching Hospitals NHS Trust, via the Yorkshire and Humber Care Record. The feedback has been hugely positive:

“This is a big step forward for us as a GP practice, and more importantly for our patients. As soon as we gained access to the Yorkshire and Humber Care Record we could see the outcome of Leeds appointments for our cancer patients.

“We have a full picture of medication changes, treatments and care plans that we can access at the point of care. This provides considerable reassurance to our patients, as well as helping us make rapid and joined-up decisions about their care. We're also seeing an impact in the time saved chasing results or discharge summaries.”

**Dr Chris Stanley,**  
Haxby Group Practice in York

The Yorkshire and Humber Care Record will support people working in health and care services to provide patients with better and more joined-up care.

It will make care safer because everyone involved in treating patients will have access to the most up-to-date and accurate information about the medicines patients are taking and any allergies they may have.

It will also help to avoid unnecessary or duplicate tests and procedures, and reduce paperwork for doctors, nurses and other staff, giving them more time to spend on patient care.

## Next steps

- > Rolling out the Yorkshire and Humber Care Record to more GP practices in Humber, Coast and Vale.
- > Connecting the Yorkshire and Humber Care Record to other hospitals – including those in North Lincolnshire, Goole, Hull and York.
- > Rolling out the Electronic Palliative Care Co-ordination System (EPaCCS) – which supports shared end-of-care planning.
